CEO Comments

Joey Wat, CEO of Yum China, commented, “I am pleased to announce that we achieved solid results in the second quarter. We turned same-store sales growth positive while expanding our store portfolio to nearly 17,000 locations. We delivered double-digit growth in operating profit and substantially expanded our margins. KFC stayed resilient and Pizza Hut sustained its momentum. Our dual focus on innovation and operational efficiency enabled us to deliver compelling value and experiences to our customers. We sparked cravings with innovative and great-tasting food, including the Crazy Spicy Zinger at KFC and the upgraded hand-crafted thin-crust pizza at Pizza Hut. In addition to great value for money, our meal sets with IP-themed toys brought emotional value to our customers and helped us set a new 2025 daily sales record on Children’s Day.”

Wat continued, “We are always exploring ways to broaden our addressable market. KFC has expanded KCOFFEE cafes to over 1,300 locations, leveraging KFC’s store space, various in-store resources and membership. Pizza Hut’s new menu has widened our price ranges, reaching previously underserved customer segments and contributing to double-digit same-store transactions growth for the quarter. At the same time, we are reinforcing our strategic moat via our membership programs and Super Apps, and enhancing the in-store experience, while capturing additional traffic on delivery platforms. We are also fortifying our end-to-end digitalization to streamline operations and elevate our customer experience. With the strength of our brands and our strategies, we are confident in delivering sustainable, long-term value for our shareholders.”

In this press release:

- Certain performance metrics and non-GAAP measures are presented excluding the impact of foreign currency translation (“F/X”). These amounts are derived by translating current year results at prior year average exchange rates. We believe the elimination of the F/X impact provides better year-to-year comparability without the distortion of foreign currency fluctuations.
- System sales growth reflects the results of all restaurants regardless of ownership, including Company-owned and franchise restaurants that operate our restaurant concepts, except for non-Company-owned restaurants for which we do not receive a sales-based royalty. Sales of franchise restaurants typically generate ongoing franchise fees for the Company at an average rate of approximately 6% of system sales. Franchise restaurant sales are not included in Company sales in the Condensed Consolidated Statements of Income; however, the franchise fees are included in the Company’s revenues. We believe system sales growth is useful to investors as a significant indicator of the overall strength of our business as it incorporates all of our revenue drivers, Company and franchise same-store sales as well as net unit growth.
- Effective January 1, 2018, the Company revised its definition of same-store sales growth to represent the estimated percentage change in sales of food of all restaurants in the Company system that have been open prior to the first day of our prior fiscal year, excluding the period during which stores are temporarily closed. We refer to these as our "base" stores. Previously, same-store sales growth represented the estimated percentage change in sales of all restaurants in the Company system that have been open for one year or more, including stores temporarily closed, and the base stores changed on a rolling basis from month to month. This revision was made to align with how management measures performance internally and focuses on trends of a more stable base of stores.

Reconciliation of Reported GAAP Results to Non-GAAP Measures
(in millions, except per share data)
(unaudited)

In addition to the results provided in accordance with U.S. Generally Accepted Accounting Principles (“GAAP”) in this press release, the Company provides the following non-GAAP measures:

- Measures adjusted for Special Items, which include Adjusted Operating Profit, Adjusted Net Income, Adjusted Earnings Per Common Share (“EPS”), Adjusted Effective Tax Rate and Adjusted EBITDA;
- Company Restaurant Profit (“Restaurant profit”) and Restaurant margin;
- Core Operating Profit and Core OP margin, which exclude Special Items, and further adjusted for Items Affecting Comparability and the impact of F/X;

These non-GAAP measures are not intended to replace the presentation of our financial results in accordance with GAAP. Rather, the Company believes that the presentation of these non-GAAP measures provides additional information to investors to facilitate the comparison of past and present results, excluding those items that the Company does not believe are indicative of our core operations.

With respect to non-GAAP measures adjusted for Special Items, the Company excludes impact from Special Items for the purpose of evaluating performance internally and uses them as factors in determining compensation for certain employees. Special Items are not included in any of our segment results.

Adjusted EBITDA is defined as net income including noncontrolling interests adjusted for equity in net earnings (losses) from equity method investments, income tax, interest income, net, investment gain or loss, depreciation and amortization, store impairment charges, and Special Items. Store impairment charges included as an adjustment item in Adjusted EBITDA primarily resulted from our semi-annual impairment evaluation of long-lived assets of individual restaurants, and additional impairment evaluation whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. If these restaurant-level assets were not impaired, depreciation of the assets would have been recorded and included in EBITDA. Therefore, store impairment charges were a non-cash item similar to depreciation and amortization of our long-lived assets of restaurants. The Company believes that investors and analysts may find it useful in measuring operating performance without regard to such non-cash items.

Restaurant Profit is defined as Company sales less expenses incurred directly by our Company-owned restaurants in generating Company sales, including cost of food and paper, restaurant-level payroll and employee benefits, rent, depreciation and amortization of restaurant-level assets, advertising expenses, and other operating expenses. Company restaurant margin percentage is defined as Restaurant profit divided by Company sales. We also use Restaurant profit and Restaurant margin for the purposes of internally evaluating the performance of our Company-owned restaurants and we believe they provide useful information to investors as to the profitability of our Company-owned restaurants.

Core Operating Profit is defined as Operating Profit adjusted for Special Items, and further excluding Items Affecting Comparability and the impact of F/X. We consider quantitative and qualitative factors in assessing whether to adjust for the impact of items that may be significant or that could affect an understanding of our ongoing financial and business performance or trends. Items such as charges, gains and accounting changes which are viewed by management as significantly impacting the current period or the comparable period, due to changes in policy or other external factors, or non-cash items pertaining to underlying activities that are different from or unrelated to our core operations, are generally considered “Items Affecting Comparability.” Examples of Items Affecting Comparability include, but are not limited to: temporary relief from landlords and government agencies; VAT deductions due to tax policy changes; and amortization of reacquired franchise rights recognized upon acquisitions. We believe presenting Core Operating Profit provides additional information to further enhance comparability of our operating results and we use this measure for purposes of evaluating the performance of our core operations. Core OP margin is defined as Core Operating Profit divided by Total revenues, excluding the impact of F/X.

The following tables set forth the reconciliation of the most directly comparable GAAP financial measures to the non-GAAP financial measures. The reconciliation of GAAP Operating Profit to Restaurant Profit and Core Operating Profit by segment is presented in Segment Results within this release.
