CEO and CFO Comments

"We recorded 4% system sales growth during the third quarter, excluding foreign exchange impact, as we expanded our portfolio and delivered more value-oriented offerings to address growing competition and softer trading conditions," said Joey Wat, CEO of Yum China. "KFC continued to perform well, posting 1% same-store sales growth during the quarter, on top of a 10% growth in the same period last year. Pizza Hut recorded a 5% decline in same-store sales during the quarter, as healthy growth in delivery was offset by lower dine-in traffic. We made further progress on the revitalization program as we launched a refreshed brand identity, improved our value proposition, expanded our digital capabilities to include tableside ordering via mobile, and generated greater delivery traffic through our own channels."

"Looking ahead, we are excited by the opportunity to grow our portfolio in China's western quick service restaurant and casual dining markets. We will continue to add a range of store formats across the spectrum of low and high tier cities to drive growth. We will also build out our digital and delivery eco-system so that we can better serve our customers and create a seamless online to offline experience," said Ms. Wat.

"We are pleased to report that we effectively managed restaurant margins at both brands during the quarter, despite an increase in promotional activities," said Jacky Lo, CFO of Yum China. "Pizza Hut maintained operating profit at the same level as the year ago period due to more targeted investments in new products and better labor efficiencies."

"With a solid balance sheet and strong cash generation, we returned over \$132 million of capital to our shareholders through a combination of share buybacks and dividends in the third quarter. We are pleased to announce that we increased our quarterly cash dividend by 20% to \$0.12 per share, and expanded our share repurchase authorization by \$850 million to a total of \$1.4 billion. We are committed to continuing to create long-term value for our shareholders," added Mr. Lo.

Digital and Delivery

- As of September 30, 2018, the KFC loyalty program had over 145 million members and the Pizza Hut loyalty program had over 50 million members, an increase of 45 million and 20 million, respectively, year over year.
- Mobile payments accounted for 64% of Company sales in the quarter, an increase of 17 percentage points year over year. Digital payments accounted for 82% of Company sales in the quarter, an increase of 18 percentage points year over year.
- Delivery contributed to 17% of Company sales in the third quarter of 2018, an increase of 3 percentage points year over year. Delivery services are now available in 1,063 cities, up from 864 cities in the prior year period.

In this press release:

- The Company provides certain percentage changes excluding the impact of foreign currency translation ("F/X"). These amounts are derived by translating current year results at prior year average exchange rates. We believe the elimination of the F/X impact provides better year-to-year comparability without the distortion of foreign currency fluctuations.
- System sales growth reflects the results of all restaurants regardless of ownership, including Company-owned, franchise and unconsolidated affiliate restaurants that operate our restaurant concepts, except for non-Company-owned restaurants for which we do not receive a sales-based royalty. Sales of franchise and unconsolidated affiliate restaurants typically generate ongoing franchise fees for the Company at a rate of approximately 6% of system sales. Franchise and unconsolidated affiliate restaurant sales are not included in Company sales on the Consolidated Statements of Income; however, the franchise fees are included in the Company's revenues. We believe system sales growth is useful to investors as a significant indicator of the overall strength of our business as it incorporates all of our revenue drivers, Company and franchise same-store sales as well as net unit growth.
- Effective January 1, 2018, the Company revised its definition of same-store sales growth to represent the estimated percentage change in sales of food of all restaurants in the Company system that have been open prior to the first day of our prior fiscal year. We refer to these as our "base" stores. Previously, same-store sales growth represented the estimated percentage change in sales of all restaurants in the Company system that have been open for one year or more, and the base stores changed on a rolling basis from month to month. This revision was made to align with how management measures performance internally and focuses on trends of a more stable base of stores. Prior period results have been adjusted accordingly.
- Company Restaurant profit ("Restaurant profit") is defined as Company sales less expenses incurred directly by our Company-owned restaurants in generating Company sales. Company restaurant margin percentage is defined as Restaurant profit divided by Company sales.

Reconciliation of Reported GAAP Results to Adjusted Measures
(amounts in US\$ million, except for per share amounts)
(unaudited)

In addition to the results provided in accordance with US Generally Accepted Accounting Principles ("GAAP") in this press release, the Company provides measures adjusted for Special Items, which include Adjusted Operating Profit, Adjusted Diluted Earnings Per Common Share, Adjusted Effective Tax Rate and Adjusted EBITDA, which we define as net income including noncontrolling interests adjusted for income tax, interest and other income, net, depreciation, amortization and other items, including store impairment charges. The Special Item for the year to date ended September 30, 2018 represents a gain recognized from the re-measurement of our previously held equity interest in Wuxi KFC at fair value upon acquisition, as described in the accompanying notes. The Special Item for the quarter and year to date ended September 30, 2017 represents income from the reversal of contingent consideration. The Company excludes impact from Special Items for the purpose of evaluating performance internally. Special Items are not included in any of our segment results. In addition, the Company provides Adjusted EBITDA because we believe that investors and analysts may find it useful in measuring operating performance without regard to items such as income tax, interest and other income, net, depreciation, amortization and other items, including store impairment charges. These adjusted measures are not intended to replace the presentation of our financial results in accordance with GAAP. Rather, the Company believes that the presentation of these adjusted measures provide additional information to investors to facilitate the comparison of past and present results, excluding those items that the Company does not believe are indicative of our ongoing operations due to their nature. These adjusted measures should not be considered in isolation or as a substitute for GAAP financial results, but should be read in conjunction with the unaudited Consolidated Statements of Income and other information presented herein. A reconciliation of the most directly comparable GAAP measures to adjusted measures follows.
