CEO and CFO Comments

"We achieved a 6% increase in system sales in constant currency during the fourth quarter, marking our ninth consecutive quarter of system sales growth since the spin-off," said Joey Wat, CEO of Yum China. "This strong growth was led by accelerated new store openings and a robust performance at KFC, which delivered 3% same-store sales growth and 9% system sales growth during the quarter. Although Pizza Hut's sales remained soft, we are pleased to see same-store traffic growth of 1% and positive trends in customer feedback."

"In 2018, we aggressively expanded our footprint with 819 new stores across all city tiers, further strengthening our market position and laying a solid foundation for growth. While the macro backdrop is relatively soft, with our resilient business model and leadership in digital and delivery, we are confident that we have the right strategy and capabilities to maintain our growth trajectory and capitalize on the long-term potential of the China market," added Ms. Wat.

"Our strong sales growth and diligent cost controls across all aspects of our business led to a significant increase in operating profit during the fourth quarter. We also delivered on our commitment to return capital to shareholders with \$473 million of share repurchases and cash dividends in 2018, including \$191 million in the fourth quarter." said Jacky Lo, CFO of Yum China. "Looking into 2019, we are well positioned to face potential market softness while recognizing the first quarter of 2019 will be a tough lap given the excellent performance during the past three Chinese New Year holidays."

In this press release:

- The Company provides certain percentage changes excluding the impact of foreign currency translation ("F/X"). These amounts are derived by translating current year results at prior year average exchange rates. We believe the elimination of the F/X impact provides better year-to-year comparability without the distortion of foreign currency fluctuations.
- System sales growth reflects the results of all restaurants regardless of ownership, including Company-owned, franchise and unconsolidated affiliate restaurants that operate our restaurant concepts, except for non-Company-owned restaurants for which we do not receive a sales-based royalty. Sales of franchise and unconsolidated affiliate restaurants typically generate ongoing franchise fees for the Company at a rate of approximately 6% of system sales. Franchise and unconsolidated affiliate restaurant sales are not included in Company sales on the Consolidated Statements of Income; however, the franchise fees are included in the Company's revenues. We believe system sales growth is useful to investors as a significant indicator of the overall strength of our business as it incorporates all of our revenue drivers, Company and franchise same-store sales as well as net unit growth.
- Effective January 1, 2018, the Company revised its definition of same-store sales growth to represent the estimated percentage change in sales of food of all restaurants in the Company system that have been open prior to the first day of our prior fiscal year. We refer to these as our "base" stores. Previously, same-store sales growth represented the estimated percentage change in sales of all restaurants in the Company system that have been open for one year or more, and the base stores changed on a rolling basis from month to month. This revision was made to align with how management measures performance internally and focuses on trends of a more stable base of stores. Prior period results have been

adjusted accordingly.

- Company Restaurant profit ("Restaurant profit") is defined as Company sales less expenses incurred directly by our Company-owned restaurants in generating Company sales. Company restaurant margin percentage is defined as Restaurant profit divided by Company sales.

Reconciliation of Reported GAAP Results to Adjusted Measures
(amounts in US\$ million, except for per share amounts)
(unaudited)

In addition to the results provided in accordance with US Generally Accepted Accounting Principles ("GAAP") in this press release, the Company provides measures adjusted for Special Items, which include Adjusted Operating Profit, Adjusted Net Income, Adjusted Diluted Earnings Per Common Share, Adjusted Effective Tax Rate and Adjusted EBITDA, which we define as net income including noncontrolling interests adjusted for income tax, interest income, net, investment loss, depreciation, amortization and other items, including store impairment charges and Special Items. The Special Items consist of impairment on assets acquired from Daojia, gain recognized from the re-measurement of our previously held equity interest in Wuxi KFC at fair value upon acquisition, income from the reversal of contingent consideration previously recorded for a business combination and tax impact from the Tax Cuts and Jobs Act of 2017 ("the Tax Act"), as described in the accompanying notes. The Company excludes impact from Special Items for the purpose of evaluating performance internally. Special Items are not included in any of our segment results. In addition, the Company provides Adjusted EBITDA because we believe that investors and analysts may find it useful in measuring operating performance without regard to items such as income tax, interest income, net, investment loss, depreciation, amortization and other items, including store impairment charges. These adjusted measures are not intended to replace the presentation of our financial results in accordance with GAAP. Rather, the Company believes that the presentation of these adjusted measures provide additional information to investors to facilitate the comparison of past and present results, excluding those items that the Company does not believe are indicative of our ongoing operations due to their nature. These adjusted measures should not be considered in isolation or as a substitute for GAAP financial results, but should be read in conjunction with the unaudited Consolidated Statements of Income and other information presented herein. A reconciliation of the most directly comparable GAAP measures to adjusted measures follows.

Amount includes revenues and expenses associated with transactions with franchisees and unconsolidated affiliates such as inventory procurement and other services provided to franchisees and unconsolidated affiliates. The Corporate and Unallocated column in the above tables includes, among other amounts, all amounts that we have deemed Special Items. See "Reconciliation of Reported GAAP Results to Adjusted Measures".

**Notes to the Consolidated Statements of Income, Consolidated Balance Sheets,
Consolidated Statements of Cash Flows and Reconciliation of Reported GAAP Results to Adjusted Measures
(amounts in US\$ million)
(unaudited)**

(a) Amounts presented as of and for the quarter and year ended December 31, 2018 are unaudited, and the Company's Annual Report on Form 10-K for the year ended December 31, 2018 may contain updates to the information disclosed in this press release.

(b) During the year ended December 31, 2018, we recorded an impairment charge of \$12 million on intangible assets of the Daojia business. It was included in Closures and impairment expenses in our Consolidated Statement of Income, but was not allocated to any segment for performance reporting purposes. We recorded a tax benefit of \$3 million associated with the impairment and allocated \$1 million of the after-tax impairment charge to noncontrolling interests.

(c) As a result of the acquisition of Wuxi KFC in the first quarter of 2018, the Company recognized a gain of \$98 million from the re-measurement of our previously held 47% equity interest at fair value, which was not allocated to any segment for performance reporting purposes.

(d) During the year ended December 31, 2017, we recognized income from the reversal of contingent consideration previously recorded for a business combination as the likelihood of making payment became remote.

(e) The tax expense was determined based upon the nature, as well as the jurisdiction, of each Special Item at the applicable tax rate.

(f) The Company incurred an estimated one-time income tax charge of \$164 million in the fourth quarter of 2017, as a result of the Tax Act, due to the transition tax on deemed repatriation of accumulated undistributed earnings of foreign subsidiaries, and additional tax related to the revaluation of certain deferred tax assets. In the fourth quarter of 2018, we recognized a tax benefit of \$36 million as a result of adjusting the provisional amount of transition tax previously recorded.
